Project Name	FreelanceHub — Freelancing Marketplace
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

1. Problem Statement Definition

How might we bridge the gap between clients and freelancers with a secure, reliable, and user-friendly freelancing platform that simplifies project posting, hiring, communication, and project management?

2. Brainstormed Idea Groups

- **User Interface Features:** Modular React components with role-based dashboards, job browsing, project posting, proposal submission, profile management, and responsive navigation.
- **Secure Infrastructure Features:** JWT-based authentication with protected routes, role-based access control, secure API communication, and middleware to protect restricted client, freelancer, and admin features.
- **Project Management Features:** Centralized project management system supporting job posting, proposal comparison, freelancer hiring, messaging, work submission, project completion, reviews, and transaction tracking.
- **Admin Management Features:** Centralized administrative dashboard displaying registered users, active projects, transactions, and overall platform activity.

3. Idea Prioritization Matrix

- **High Importance / High Feasibility:** User registration and login, Client/Freelancer role selection, project posting, job browsing, proposal submission, hiring workflow, messaging, project tracking, reviews, and basic transaction management.
- **High Importance / Lower Feasibility (Future Enhancements):** AI-based freelancer recommendation, intelligent project matching, automated fraud detection, advanced payment gateway integration, real-time notifications, and AI-powered project assistance.
